- **Project motive**
- **Project objectives**
- **Tools, Technologies and Services**
- **Usefulness**
- **Path way**
- **Expected outcomes**

# Introduction

- RENTINA will provide the **Information** about **Rooms/Flats/Houses** which is available for Rent.
- RENTINA System application will make **easy to find** the location of Rooms/Flats/Houses, select no. of rooms and other facts by the renter.
- It will make easy to **upload the location, contact No., expected rent, No. of rooms, Facilities** and other information by landlord/room-master.

- This application will be able to show the rooms/flats/houses with in a **particular area selected by user.**

## Project Motive

- The app, which is free for Android users, allows you to browse rooms/flats/houses for rent, along with high quality pictures, Videos and maps.
- It boasts a simple, intuitive interface that lets you contact Home-owners with just a tap.
- This can make the otherwise difficult process hassle-free as You can find the budget and location as per your desires.

# PROJECT OBJECTIVES

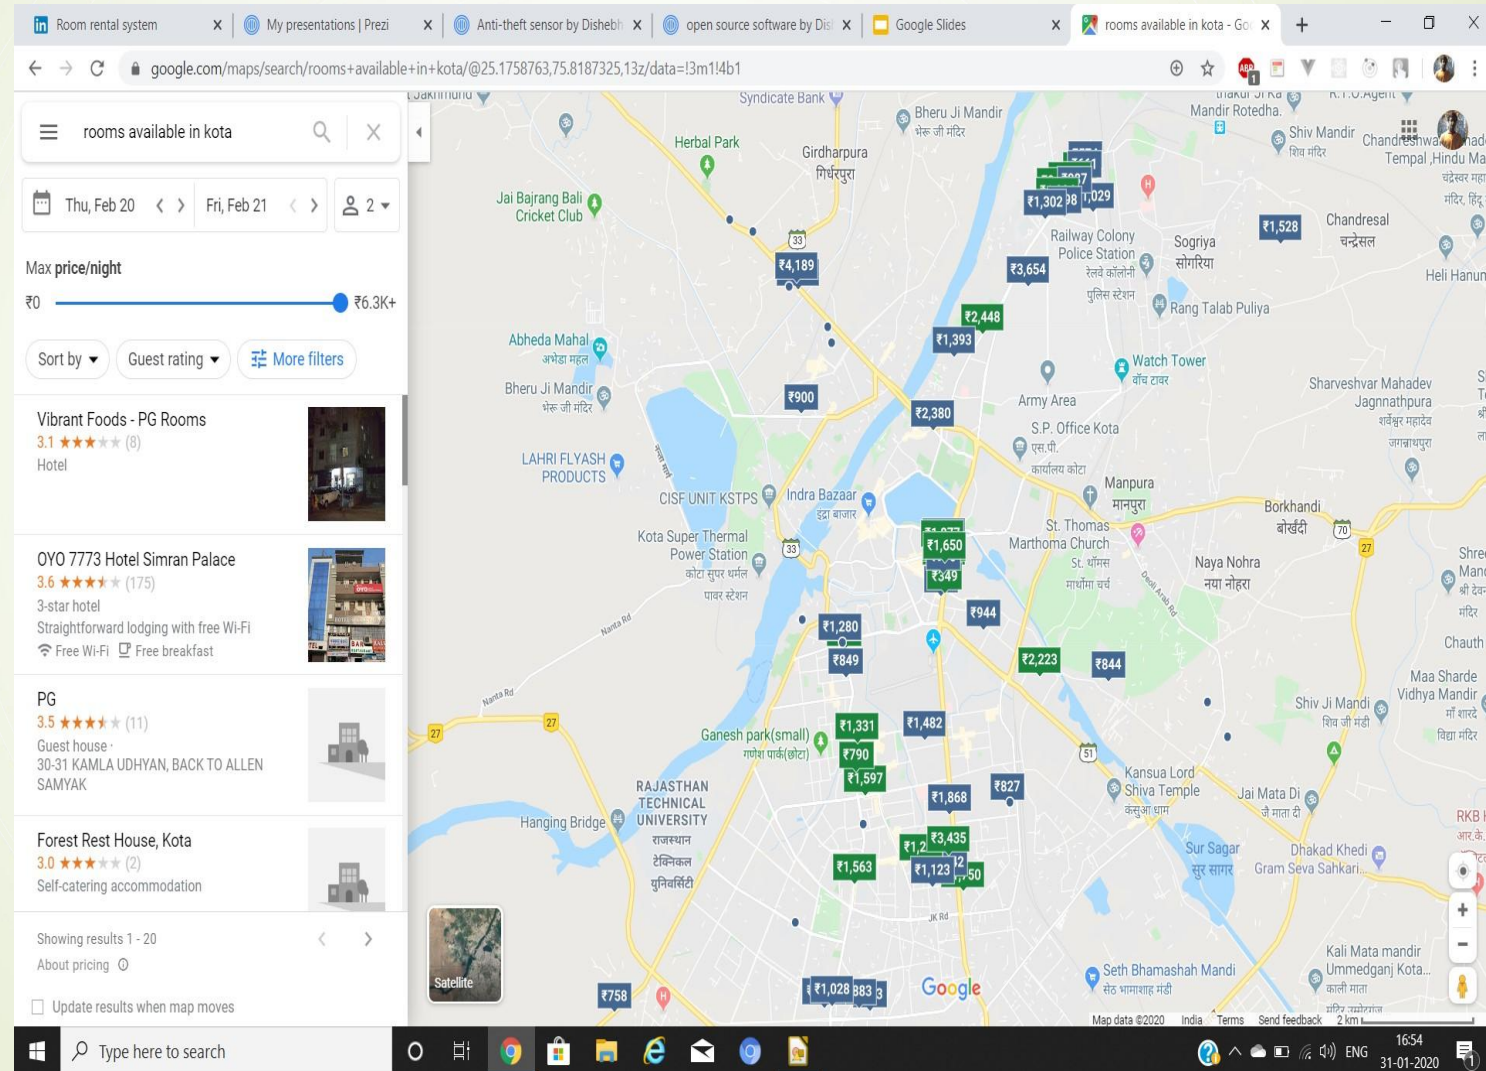

- Study of currently available open source applications developed in foreign countries.
- Analysis the applications and try to modify them according to

Indian environment.

- Try to develop an efficient application that will be helpful for not only renters but also landlords.
- Application development will be done according to requirement of both renters and landlords.

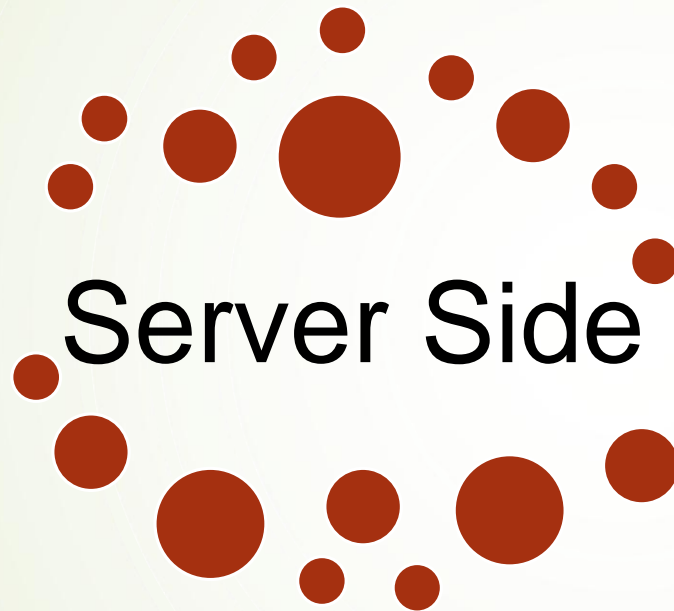

# An Outlook of availability of Rooms/flats :

# TECHNOLOGIES, TOOLS AND SERVICES

- Real time database (Firebase)
- Java

Client  
Side

- Android Development Tool Kit
